BRAND HISTORY

FOUNDED IN 2014

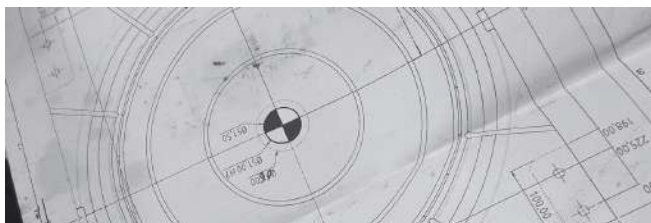

BOXPT Equipment was established to meet the growing demand for cross-training equipment in Portugal and across Europe.

The company has earned the trust of customers in the domestic market and has been expanding internationally since 2016. Since then, it has gained recognition in the markets of Spain, France, Brazil and Angola.

BOXPT became the first Portuguese company in its sector to obtain ISO 9001 certification from TÜV in 2019, reinforcing its commitment to excellence in customer service.

During the pandemic, BOXPT responded swiftly to the drop in sales, strengthened its presence in the B2B market and expanded its online sales channels, where it began local production of training equipment.

Today, BOXPT continues to grow and consolidate its market presence, focusing on encouraging participation in sport, improving people's quality of life and supporting athletes in their performance. We therefore remain committed to domestic production and the continuous improvement of quality.

SHALL WE TALK ABOUT YOUR PROJECT?

EQUIPMENT FOR TRAINING, WELLBEING AND PERFORMANCE

WE BRING YOUR

WE CREATE TAILORED

STEP 1

FIRST CONTACT

We analyse your project, space and initial objectives to understand the requirements of your training space.

STEP 2

BRAINSTORMING SESSION

We explore the concept in depth, align expectations and define the strategic vision so that every detail matches what you want to build.

STEP 3

3D DESIGN

We create a functional layout and a 3D design that allows you to visualise the finished space before installation, ensuring well-informed decisions.

PROJECT TO LIFE

MADE SPACES

STEP 4

PROJECT AND PROPOSAL CLOSURE

We offer the most suitable technical and financial solution, including the option of leasing to optimise your investment.

STEP 5

INSTALLATION AND ASSEMBLY

We coordinate the entire process with specialist teams, ensuring that the installation is carried out efficiently, safely and in line with the approved design.

STEP 6

PROJECT COMPLETED

We deliver the space fully kitted out, ensuring high-performance equipment and ongoing support for a premium experience from day one.
