

Ludium Lab's technology allows the virtualization of any software or application in the cloud by optimizing server resources, eliminating hardware & software barriers and democratizing its use.

Our cloud gaming solution adapts to any service provider, telco or customer offering the possibility to customize the platform to your needs and branding with the latest features.

Services and products

Gaming B2C platform created by Ludium Lab

Streaming services for cloud gaming at maximum performance.

Virtualization and streaming of services & software.

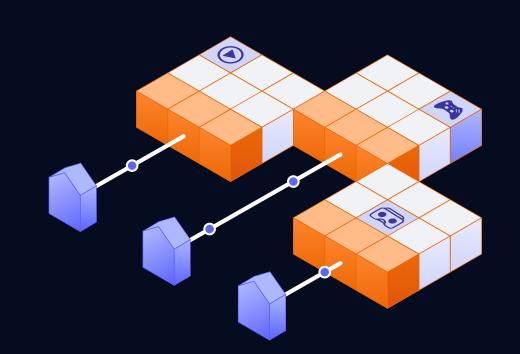

B2C platform app with several categories

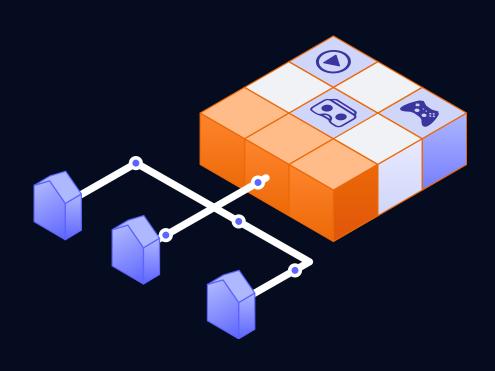

Our advantages

Non-SaaS scenario limits clearly the scalability of the software usage and force companies to have an extra investment in hardware and software.

The user will be able to use any software from any device directly from the cloud without the need of installing software. The perfect solution for high-hardware demand.

Other companies Not 100% of the resources are exploited.

Ludium Lab Our technology optimizes servers to offer the service to more users.
