The Portuguese Textile and Clothing Industry

Renowned for its tradition, but above all for the industrial know-how and a strong commitment to quality, innovation, design, technology, knowledge, differentiation, ethics and sustainability, the Textile and Clothing Industry is one of the most important industries in Portugal and in the European Union.

In Portugal it represents 17% of employment, 10% of GVA and 8% of production and turnover in the manufacturing industry. As a sector with an international vocation, its exports represent 8% of national exports of goods.

At European Union level, Portugal is one of the main industrial textile and clothing players, ranking in 5th place for turnover and GVA and in 4th place for employment.

In Portugal, we find a complete, integrated and interdependent cluster, which works in close cooperation with the different players, always aiming to respond to the customer's needs, in constant change and evolution, to which a culture of flexibility and customer service is essential.

This industry is internationally recognized by the main players as an example of success, resilience and for overcoming the different challenges faced.

And in fact, since 2020, this industry has experienced the impact of a pandemic crisis with serious disruptions in the supply chain and consumption, a war in Europe and an energy crisis followed by an inflationary crisis and a contraction in consumption.

The indicators that follow reflect the impact of these crises, but also how the industry prevailed, showing that it is an industry with a past, a present and a future.
